## DETTAGLI TECNICI

### MATERIALI:

Testina, serbatoio superiore e inferiore e anello in plastica ABS; top, fermaglio, raccordo, anello e punta in metallo. Disponibile anche nella versione micromina.

### TIMBRATURA:

solo per la Tethys Space si raccomanda di utilizzare inchiostri bicomponenti (TAMPOCAT) con i relativi diluenti.

### REFILL:

RT90 - Punta NS nickel silver.

Sfera carburo di tungsteno

diam. 1 mm.

Inchiostro blu/nero ISO 12757-2.

### CONFEZIONE:

Numero 1000 pezzi - Peso kg 18,70

Dimensione cm 48x30x23.

## TECHNICAL FEATURES

### MATERIAL:

Cap, upper and lower barrel, ring in ABS plastic; top, clip, spacer, ring and point in metal.

Available also in mechanical pencil version.

### PRINTING:

only for Tethys Space recommended bicomponent inks (e.g. TAMPOCAT) with relative diluent.

### REFILL:

RT90 - Point NS nickel silver.

Tungsten carbide

ball 1 mm.

Ink blue/black ISO 12757-2.

### PACKAGING:

Number 1000 pcs. - Weight kg 18,70

Dimension cm 48x30x23.

ECO FRIENDLY PENS.

## CARATTERISTICHE TECNICHE E COMMERCIALI

- 1** L'80% della penna è biodegradabile e compostabile (con tempi variabili in funzione dell'umidità e temperatura).
- 2** Producendo circa 5 milioni di VEGETAL PEN/INGEO PEN/BIO-S! si risparmiano 85.000 litri di benzina.
- 3** Non consumando 85.000 litri di benzina, non si introducono nell'aria 163 tonnellate di anidride carbonica (CO<sub>2</sub>) che è responsabile dell' "effetto serra" e del surriscaldamento del pianeta.
- 4** VEGETAL PEN / INGEO PEN / BIO-S! sono le uniche penne sul mercato con le suddette caratteristiche poiché STILOLINEA è l'unico produttore di penne rifornito da NATUREWORKS che è il proprietario del brevetto e produttore del materiale biodegradabile e compostabile utilizzato per costruirle.
- 5** VEGETAL PEN/INGEO PEN/BIO-S! si presentano con una forma di una vera penna.
- 6** Il materiale PLA della NATUREWORKS è un acido polilattico che viene derivato chimicamente da piante. È l'unico prodotto col quale sia possibile realizzare un corpo di penna biodegradabile anche disponibile in versione TRASPARENTE.
- 7** VEGETAL PEN/INGEO PEN/BIO-S! sono realizzate con materiale PLA della NATUREWORKS certificato DIN-CERTCO.

## TECHNICAL AND COMMERCIAL FEATURES

- 1** 80% of the pen is biodegradable and compostable (in periods changing according to humidity and temperature).
- 2** Producing about 5 millions of VEGETAL PEN / INGEO PEN / BIO-S!, 85.000 lt of gasoline are saved.
- 3** Not using 85.000 lt. of gasoline, it is avoided to introduce in the atmosphere 163 tons of CO<sub>2</sub> (Carbon Monoxide), which is the responsible of the "green house effect", which causes our planet over warming.
- 4** VEGETAL PEN / INGEO PEN / BIO-S! are the only pens on the market with the afore listed characteristics, because STILOLINEA is the only pen manufacturer supplied by NATUREWORKS, that is the owner of the patent and the manufacturer of the biodegradable and compostable material used to produce the VEGETAL PEN / INGEO PEN / BIO-S!.
- 5** VEGETAL PEN / INGEO PEN / BIO-S! are regular looking pens realized with a material of same hardness as the ABS plastic.
- 6** Material PLA of NATUREWORKS is a polylactide acid, chemically derived from plants. It is the only product that allows the production of a biodegradable pen also available in the TRANSPARENT version.
- 7** VEGETAL PEN / INGEO PEN / BIO-S! are made of NATUREWORKS PLA material certified DIN-CERTCO.

## Informazioni per la corretta marcatura.

- 1) VEGETAL PEN/INGEO PEN/BIO-S! possono essere marcate con vernici standard acriliche.
- 2) Si ricorda che VEGETAL PEN / INGEO PEN / BIO-S! sono biodegradabili e quindi sensibili al calore: durante il processo di marcatura non possono essere sottoposte a temperature vicino alla soglia dei 48° (è consigliato max 40°)
- 3) Per le marcature è necessario l'utilizzo di vernici bicomponenti. Per la perfetta tenuta della marcatura e' necessario essiccare la penna per una durata minima di 36 ore e sottoporla ad una temperatura sempre inferiore ai 48° (è consigliabile max 40°). Temperature superiori provocherebbero la deformazione del corpo penna danneggiandolo in modo irreversibile.

L'inchiostro suggerito per il miglior risultato è:

TAMPOCAT - fornitura: GRUPPO GRAFICO PEGASO (vedere sito Internet: [www.pegasogruppo.com](http://www.pegasogruppo.com))

## Information for the correct printing.

- 1) VEGETAL PEN / INGEO PEN / BIO-S! can be printed using standard acrylic inks.
- 2) We remind that VEGETAL PEN / INGEO PEN / BIO-S! are biodegradable and therefore sensitive to heat: during the printing process it cannot be kept at temperatures close to 48°/120° F (max 40° is preferable).
- 3) To print it is necessary to use double-component inks. For a perfect, long-lasting result, it is necessary an ink drying process of minimum 36 hours at a temperature lower than 48° (max 40° is preferable). Higher temperatures would cause the distortion of the pen, damaging it irreversibly.

The right ink for the best result is:

TAMPOCAT - supplier: GRUPPO GRAFICO PEGASO (website: [www.pegasogruppo.com](http://www.pegasogruppo.com))

“Per le aziende attente  
alla sostenibilità ambientale:  
la penna Ingeo,  
realizzata in P1A,  
materiale ecologico compostabile  
certificato, è una scelta economica  
e responsabile.”

“For companies careful to  
environmental sustainability:  
the Ingeo pen, realized in P1A,  
a certified eco-friendly and  
compostable material, is a  
cheap and responsible choice.”

## Stilolinea, azienda "eco-friendly company" dichiara che le sue Eco-Pens in PLA:

- sono tutte garantite e sono uniche sul mercato grazie all'esclusivo brevetto

- sono realizzate con materiale PLA della NatureWorks certificato DIN-CERTCO.

- offrono la stessa rigidità, funzionalità e versatilità della plastica, anche nelle versioni trasparenti.

## Stilolinea "eco friendly company" state that its PLA Eco pens:

- are warranted and unique in the market thanks to the exclusive NatureWorks patent.

- are made of NatureWorks PLA material certified DIN-CERTCO

- do offer the same plastic stiffness, functionality and versatility, also in the frosty version.

## DETTAGLI TECNICI

**MATERIALI:**  
Pulsante, testina-fermaglio, anelli, serbatoio e punta in plastica ABS riciclata.

**REFILL:**  
RX10 - Punta ottone.  
Sfera carburo di tungsteno diam.1 mm.  
Inchiostro DOKUMENTAL ISO 12757-2.

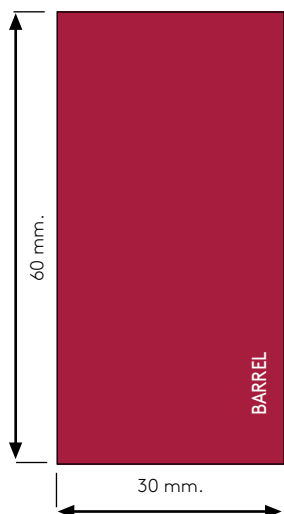

**CONFEZIONE:**  
Numero 1000 pezzi - Peso kg 9,5  
Dimensione cm 48x30x17.

## TECHNICAL FEATURES

**MATERIAL:**  
Pusher, cap-clip, rings, barrel and point in recycled ABS plastic.

**REFILL:**  
RX10 - Brass point.  
Tungsten carbide ball 1 mm.  
DOKUMENTAL ink ISO 12757-2.

**PACKAGING:**  
Number 1000 pcs.  
Weight kg 9,5  
Dimension cm 48x30x17.

ANTI BACTERIAL PENS

# iPROTECT Antibacterial Pen

## PERCHÉ ACQUISTARE LA PENNA ANTIBATTERICA IPROTECT. L'UNICA CON IONI DI ZINCO.

- 1** iPROTECT è conforme agli Standard Internazionali molto esigenti della normativa ISO 22196 (JIS Z 2801).
- 2** iPROTECT ha una copertura del 99% contro i batteri Escherichia Coli e Staphylococcus Aureus.
- 3** L'additivo antibatterico è utilizzato nel processo di produzione durante lo stampaggio e la sua efficacia ha una durata pari alla vita stessa della penna.
- 4** Non è un trattamento superficiale, l'azione antibatterica della iPROTECT è resistente all'acqua, alle graffiature ed ai raggi ultravioletti.
- 5** Lo stesso additivo antibatterico è utilizzato in tutto il mondo con diverse applicazioni, come ad esempio pellicole, schiume, fibre per settore tessile, nastri, rivestimenti, carta, adesivi e vernici ad acqua, ecc..
- 6** Al contatto con la pelle, iPROTECT non crea problemi, anche per quelle più sensibili.
- 7** Le caratteristiche peculiari della iPROTECT ne fanno un prodotto promozionale molto valido per il settore medicale e farmaceutico.
- 8** La funzione antibatterica della penna iPROTECT è stata certificata dal Dipartimento di Sanità pubblica e Microbiologia dell'Università degli Studi di Torino e dal LEBSC del Dipartimento di Chimica dell'Università di Bologna

## WHY TO BUY IPROTECT ANTIBACTERIAL PEN. THE ONLY PEN WITH ZINC IONS.

- 1** iPROTECT has achieved the very demanding Standards required by the ISO 22196 (JIS Z 2801).
- 2** iPROTECT has effectiveness against the 99% of bacteria, i.e. Escherichia Coli and Staphylococcus Aureus
- 3** The antibacterial additive is used in the production cycle during the moulding and its efficacy lasts as long as the pen itself.
- 4** It is not a surface treatment, the iPROTECT antibacterial action is water, scratch and UV proof.
- 5** The same antibacterial additive is used all over the world with several applications, i.e. films, foams, fibres, tapes, coatings, paper, adhesives and wet paints, etc..
- 6** iPROTECT is not dangerous for the skin, even for the more sensitive ones.
- 7** iPROTECT characteristics render it a promotional product particularly suitable for the medical and pharmaceutical fields.
- 8** The antibacterial function of iPROTECT pen has been certified the Public Health and Microbiology Department of the University of Turin and by LEBSC Chemistry Department of the University of Bologna.

## I microbi nell'ambiente.

I batteri, i funghi e le muffe sono presenti nel nostro ambiente di vita quotidiano. Questi organismi microscopici si sono adattati per colonizzare e diffondersi in quasi tutti i luoghi del nostro Pianeta. Molti tipi di batteri, se in quantità limitate, sono innocui per la salute dell'uomo, anzi essi possono aiutare a rinforzare il sistema immunitario contro le infezioni e le malattie.

## Perché usare additivi antibatterici?

Alcuni microbi sono pericolosi per gli uomini e, se lasciati liberi di diffondersi, possono proliferare causando infezioni e malattie. E' importante controllare gli ambienti sensibili come gli ospedali dove la diffusione delle infezioni può causare gravi problemi.

I microbi sono anche responsabili di una grande varietà di effetti indesiderati come il deterioramento e lo scolorimento dei prodotti, odori sgradevoli o la contaminazione del cibo, solo per citarne alcuni.

Gli additivi antibatterici forniscono un ulteriore livello di protezione se combinati con le normali procedure igieniche.

## Microbes in our environment.

Bacteria, fungi and mildews are all present in our every day environment. These microscopic organisms have adapted to colonise and thrive in almost all places on earth.

Residual levels of many bacterial strains are of no consequence to human health, in fact they can help build a general level of resistance in our immune system to infection and disease.

## Why use antibacterial additives?

Certain microbes are harmful to humans and, if left free to spread, will proliferate to cause infections and diseases. There is a particular need to control sensitive environments such as hospitals where acquired infections can cause serious problems.

Microbes can also be responsible for a wide range of undesirable effects such as product deterioration and discoloration, malodour and food contamination to name but a few.

Antimicrobial additives provide an extra layer of protection when combined with normal cleaning procedures.

“É l'unica penna antibatterica presente sul mercato, agli ioni di zinco, adatta alle aziende del settore medico e paramedico, ma è anche la penna da usare a scuola, nei luoghi pubblici, negli ospedali, al bar, ecc.”

“It is the unique antibacterial pen available in the market, with zinc ions, suitable for medical and paramedical industry. It's also perfect for schools, public places, hospitals and bars, ect.”

## DETTAGLI TECNICI

### MATERIALI:

Testina, serbatoio superiore e inferiore,  
raccordo e punta in plastica ABS.  
Fermaglio e punta in metallo.  
Disponibile anche nella versione  
micromina.

### TIMBRATURA:

utilizzare inchiostri bicomponenti  
(TAMPOCAT) con i relativi diluenti.

### REFILL:

RT90 - Punta NS nickel silver.  
Sfera carburo di tungsteno diam. 1 mm.  
Inchiostro blu/nero ISO 12757-2.

### VERNICIATURA:

Vernice catalizzata bicomponente  
doppio strato, esente da cadmio,  
piombo, metalli pesanti, benzidine e  
amine aromatiche.

### CONFEZIONE:

Numero 400 pezzi - Peso kg 10,50  
Dimensione cm 48x30x17.

## TECHNICAL FEATURES

### MATERIAL:

Cap-clip, upper and lower barrel,  
spacer and point in ABS plastic.  
Metal clip and point. Available also in  
mechanical pencil version.

### PRINTING:

Bicomponent inks (e.g. TAMPOCAT)  
with relative diluent recommended.

### REFILL:

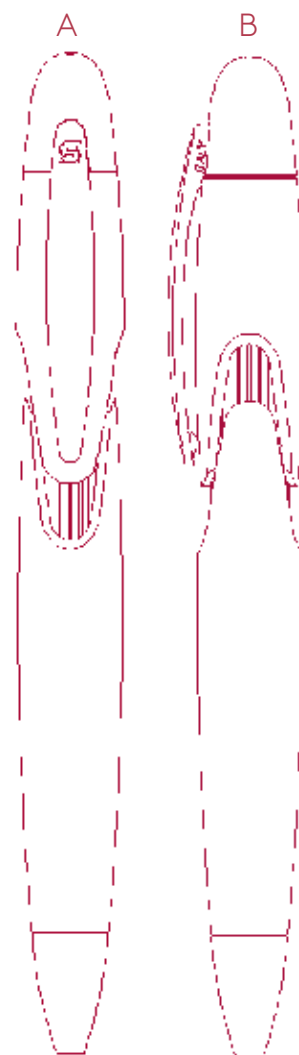

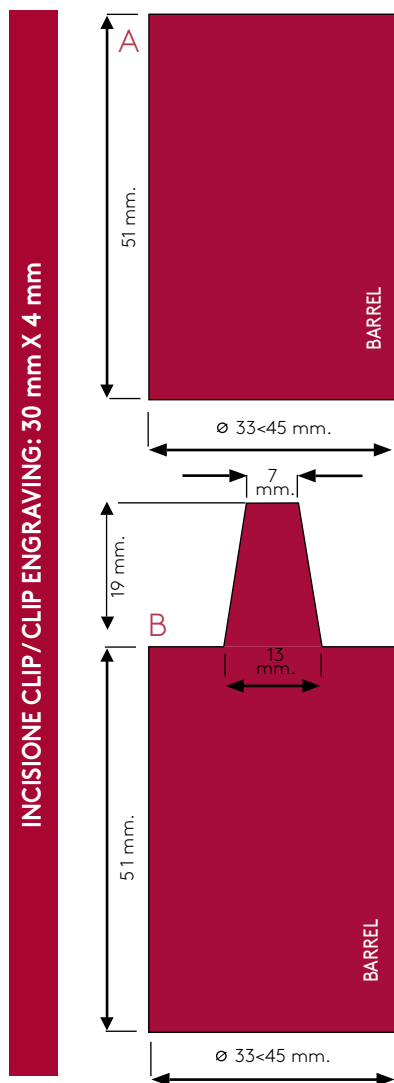

RT90 - Point NS nickel silver.  
Tungsten carbide ball 1 mm.  
Ink blue/black ISO 12757-2.

### PAINT:

Double layer bicomponent  
catalyzed paint, free from cadmium,  
lead, heavy metals, benzidine,  
aromatic amines.

### PACKAGING:

Number 400 pcs. - Weight kg 10,50  
Dimension cm 48x30x17.
